

TECH THEATRE - SET DESIGN - GOOGLE SKETCHUP EXERCISE #1

Part A - Instructions

CREATE A 3D model of the Little Theatre stage. Below is a rough 2D schematic with approximate dimensions for how the stage is constructed.

Part B - Instructions

CREATE AT LEAST *three* flats (4' x 10'). While you *do* need to consider the approximate thickness of the flat, you do not need to create individual keystones and corner blocks. ☺

**As it is unnecessary for this assignment, you should not import any items from the 3D warehouse.*
